1. POCKET

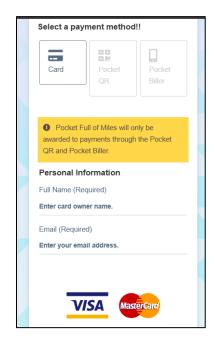

1.1 POCKET PORTAL

Built and manages the **Pocket Portal**, a web app enabling admins to efficiently manage and oversee application systems.

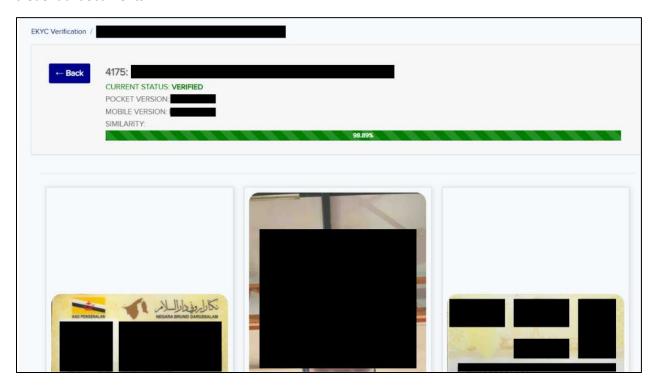

1.2 SINGLE PAGE PAYMENT INTEGRATION

Implemented a **Single Page Payment Integration**, assisting clients in seamlessly integrating their websites with Pocket Payment systems.

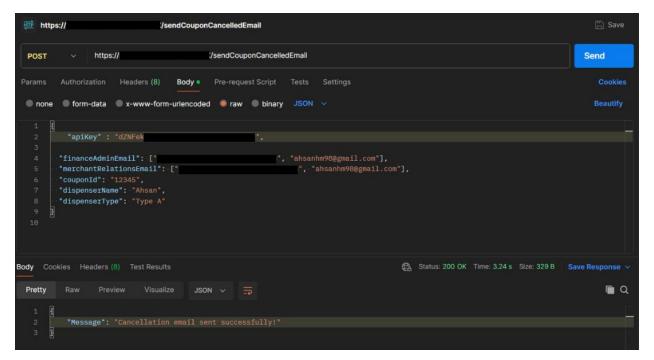

1.3 EKYC PORTAL WITH REGULA AI INTEGRATION

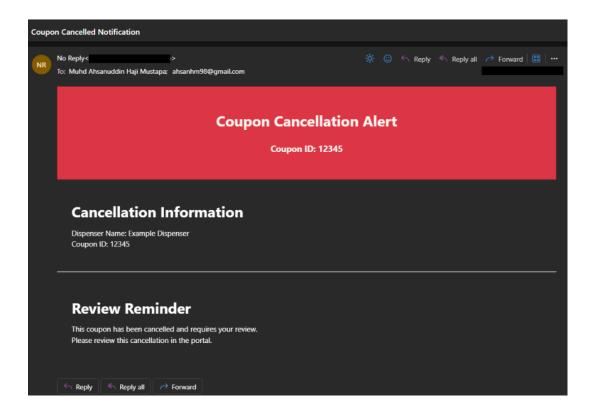

Integrated an **eKYC feature** into the portal using Regula AI, enabling efficient reading of ID cards and credential documents.

1.4 EMAIL API CALLING

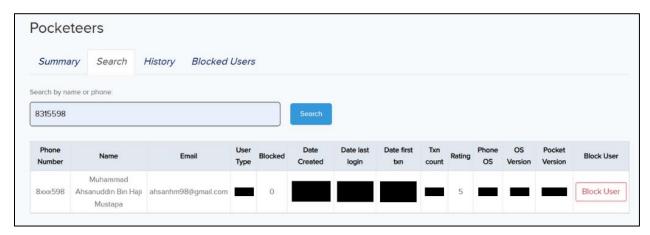

Developed an **Email API** integrating SMTP for seamless and reliable email communication.

1.5 USER PROFILING

Designed a **User Profiling** feature in the portal to identify specific users, aiding in handling complaints and detecting suspicious activity.

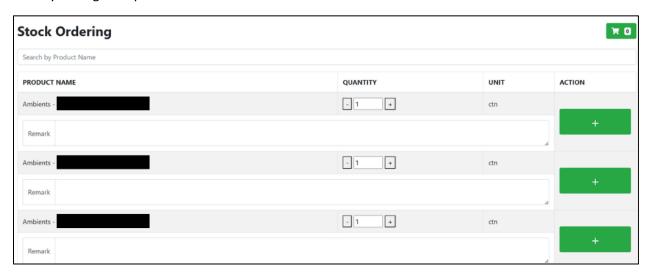

1.6 USER LOGGING

Implemented a **User Logging** system to record user activities, including login details with usernames and timestamps, for enhanced tracking and accountability.

1.7 INVENTORY RECORDING

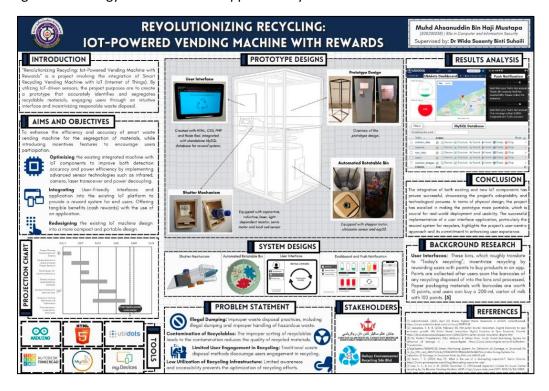

Developed an **Inventory Recording** feature, enabling users to manage and order company-related stocks directly through the portal.

2. REVOLUTIONIZING RECYCLING

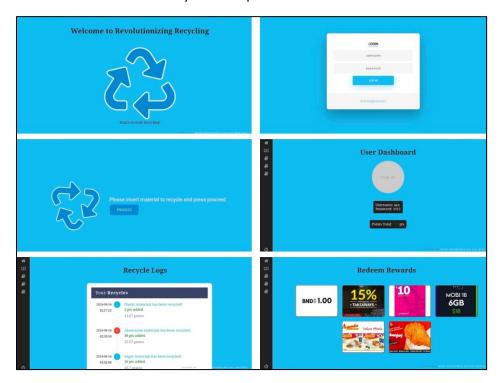

2.1 IOT PROTOTYPE SYSTEM

Completed a final-year project, **Revolutionizing Recycling**, aimed at enhancing material recycling by integrating IoT technology with an intuitive application system.

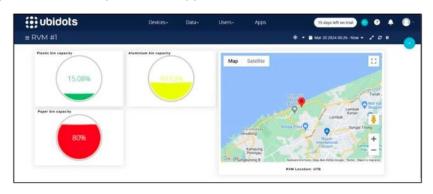

2.2 USER DASHBOARD SYSTEM

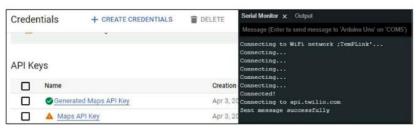

Developed a **User Dashboard System** for the **Revolutionizing Recycling** project, allowing users to create personal accounts and interact seamlessly with the platform.

2.3 MAPS LOCATION API

Integrated a **Maps Location API** into the **Revolutionizing Recycling** project, enabling users to locate nearby recycling machines directly within the application.

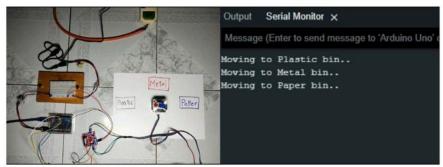

2.4 SMART RECYCLING INTEGRATION

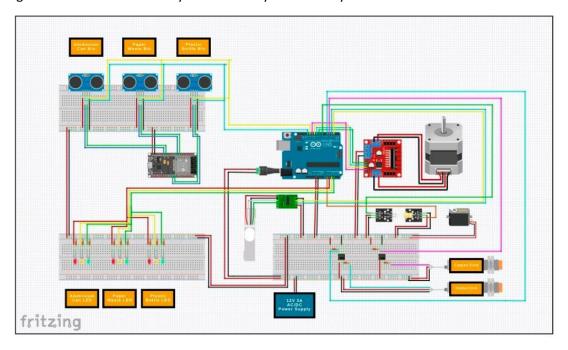

Developed a **Smart Recycling Integration** for the **Revolutionizing Recycling** project, creating a working IoT system with various devices to detect material types, weights, and control a stepper motor for waste bin operation.

2.5 CIRCUIT DESIGNING

Designed the **Circuit** for the **Revolutionizing Recycling** project, focusing on current routing and power management to ensure the safety and efficiency of the IoT system.

2.6 PROTOTYPE DESIGNING

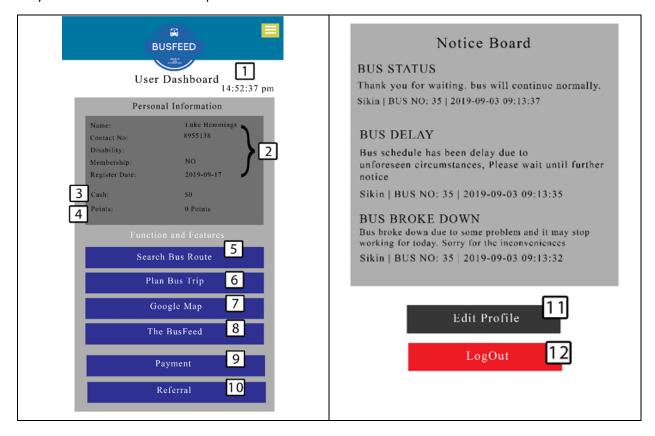

Led the **Prototype Designing** for the **Revolutionizing Recycling** project, involving hands-on work such as welding, woodworking, and crafting the physical prototype for the recycling machine.

3. BUSFEED (BUS TRACKER WEBAPP)

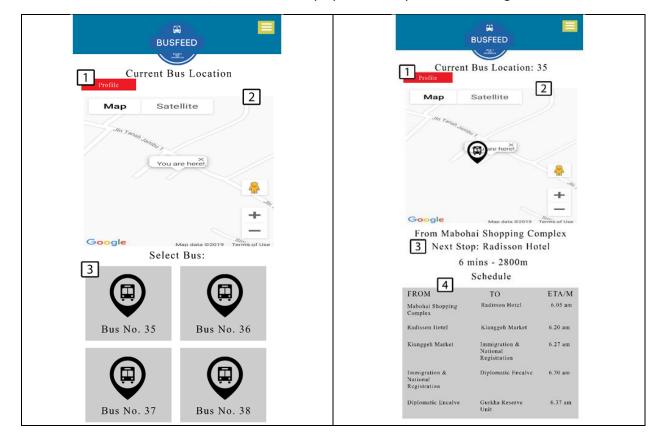

3.1 USER DASHBOARD

Developed **BusFeed**, a web app designed to track bus transport, featuring an intuitive user dashboard for easy interaction and real-time updates.

3.2 GPS INTEGRATION

Integrated **GPS functionality** into the **BusFeed** web app, allowing bus drivers to use their mobile devices to share real-time location data, which is then displayed on the system for tracking.

3.3 E-WALLET

Developed an **E-Wallet** feature for the **BusFeed** app, enabling users to make cashless payments for bus rides directly within the app.

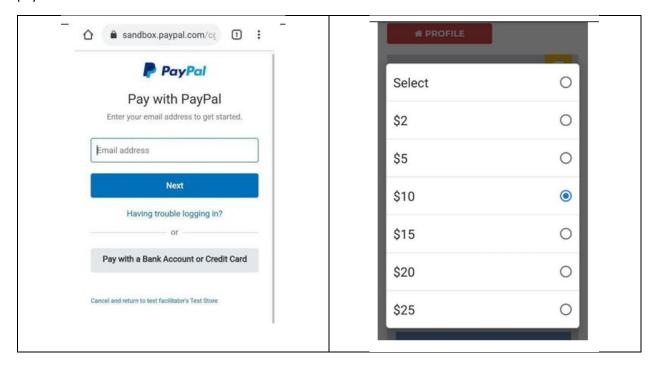

3.3 TRANSACTION REPORT

Developed a **Transaction Report** feature for the **BusFeed** app, enabling users to manage their expenses directly within the app.

3.4 PAYPAL INTEGRATION

Integrated **PayPal's payment API** into the **BusFeed** app, enabling a secure and seamless cashless payment feature for users.

3.5 ADVERTISEMENT SHOWCASES

Developed an **Advertisement Showcase** feature for the **BusFeed** app, allowing companies to rent ad space and display their advertisements to users within the app.
